

José Ricardo Gejão Dourado

Design Leader · Platform Strategy, AI & Product-Led Growth

ricardogej@gmail.com · linkedin.com/in/gejao · São Paulo, Brazil · EN / PT

Design leader operating at the intersection of Product, Platform, AI, and Organizational Scale. 15+ years of experience building products and leading design teams across fintech, AI, consumer technology, and connected-device ecosystems. Currently managing 8 designers across Security, Automation, AI, Device Management, and Platform workstreams at TELUS SmartHome+. Consistently engaged at the strategic layer — shaping product direction, driving platform transformation, aligning cross-functional leadership, and positioning design as an organizational capability rather than a delivery function.

EXPERTISE

Design Leadership · Platform Strategy · Design Systems · Product Strategy · AI-Powered Experiences
Generative UI · Cross-Functional Leadership · Design Operations · Fintech · Smart Home · SaaS · Consumer Products

EXPERIENCE

TELUS Digital

Nov 2024 – Present

Design Lead & Manager · Toronto / Remote

Leading design across TELUS SmartHome+ — Canada's connected-home platform spanning security, automation, AI, device management, and onboarding. Managing a team of 8 designers across Security, Automation, AI, Device Management, and Platform workstreams simultaneously.

- **Jarvis 2.0:** Shaped product vision and platform architecture for an AI operating layer that unified conversational automation, device control, context-aware onboarding, and troubleshooting across SmartHome+. Reached Early Market Testing stage; General Availability planned H2 2026.
- **Platform Scalability:** Led the strategic shift from device-specific UI implementations to a Server Driven UI architecture — eliminating per-device front-end engineering and enabling the platform to onboard new devices and services without custom development.
- **Self-Monitored Security:** Defined and enabled TELUS's first self-monitored security offering — establishing product scope, service architecture, notification framework, and customer onboarding to bring a viable security product to market before professional monitoring was commercially available. September 2025 MVP delivered.
- **Organization & Governance:** Built cross-functional operating model across TELUS Design, Product, Engineering, Architecture, and external AI partner Area 22. Introduced design governance, strategic review processes, and AI-powered prototyping practices across the organization.

IPSY

Feb 2023 – Nov 2024

Lead Product Designer · San Francisco / Remote

- Owned end-to-end product design for growth-critical surfaces at one of the largest beauty subscription platforms in the US — leading discovery, strategy, and delivery across member activation, engagement, and retention workstreams.
- Drove cross-functional product strategy in close partnership with Product, Engineering, Analytics, and User Research — operating as a senior design voice in roadmap prioritization and product decision-making.
- Led design for iterative product improvements targeting key moments across the subscription lifecycle, from first-time member activation through long-term engagement and churn reduction.

Intuit

Apr 2021 – Jan 2023

Design Manager & Principal Product Designer · Mountain View / Remote

- Drove +12 percentage points in recurring product usage by designing and launching the QuickBooks Bill Management Hub — a platform-level financial workflow adopted across multiple markets.

- Managed an international design team across France, Brazil, Mexico, and Australia — leading career development, cross-market alignment, and delivery quality at scale.
- Partnered with Product and Engineering leadership on banking integrations and reconciliation workflows to improve product-market fit across the QuickBooks international platform.

Samsung Electronics

Feb 2018 – Apr 2021

Lead Product Designer → UX Design Coordinator · São Paulo / Seoul

- Led product design and design governance for Samsung Pay and next-generation consumer TV experiences — owning stakeholder alignment, cross-team UX standards, and design direction across mobile commerce and consumer electronics platforms.
- Progressed from individual contributor to design coordination role, expanding scope to include standards, cross-team oversight, and mentorship within Samsung's innovation programs.

CI&T

Jul 2016 – Feb 2018

Senior UX Designer · São Paulo

- Led product design for Itaú's digital banking platform — one of Latin America's largest financial institutions — driving strategy, research, and delivery across web and mobile in agile environments.

Intel Corporation

Jan 2014 – Jul 2016

Senior UX Visual Designer · São Paulo / Portland

- Contributed to product and platform experiences across web, mobile, IoT, and open-source software — including collaboration with Google on Android multi-window and design contributions to Intel's early smart home initiatives.

S E L E C T E D A C H I E V E M E N T S

- Redefined automation creation at TELUS SmartHome+ — collapsing a multi-step configuration builder into a single conversational expression via Jarvis 2.0, currently in Early Market Testing.
- Enabled TELUS to launch a self-monitored security service before professional monitoring was commercially available — protecting business continuity and opening a new product category through design-led strategy.
- Championed a platform architecture shift (Server Driven UI) that eliminated per-device front-end engineering — a structural scalability decision with long-term product and engineering cost implications.
- Delivered +12pp increase in QuickBooks recurring product usage by designing a platform-level financial workflow adopted across multiple international markets.
- Led design teams across Canada, Brazil, France, Mexico, Australia, and the United States — managing up to 8 direct reports across concurrent enterprise product workstreams.
